

JC20 Rec'd PCT/PTO 18 MAY 2005

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

INFORMATION DISCLOSURE STATEMENT
ACCORDING TO 37 C.F.R. §1.97(b)

APPLICANT: Manfred Fuchs DOCKET NO.: P05,0173

INTERNATIONAL APPLICATION NO.: PCT/DE03/03457

INTERNATIONAL FILING DATE: October 10, 2003

INVENTION: **"METHOD FOR THE PRODUCTION OF AND PROTECTIVE LAYER
FOR LAYER OF LUMINESCENT MATERIAL"**MAIL STOP PCT
Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

In accordance with the provisions of 37 C.F.R. §1.56 and the requirements of 37 C.F.R. §1.98, Applicant respectfully requests that a citation and examination of the references identified on the attached PTO 1449 form be made during the course of examination of the above-identified application for United States Patent.

The present Information Disclosure Statement is being filed according to 37 C.F.R. §1.97(b) and before the latter occurrence of:

- (1) three months from the filing date of a national application;
- (2) three months from the date of entry of the national stage as set forth in 37 C.F.R. 1.491 in an international application; or
- (3) the mailing date of a first Office Action on the merits.

REMARKS

The attached PTO 1449 form lists related art references for the above identified application. In accordance with 37 C.F.R. §1.98(a)(2)(ii), no copies of the U.S. patent documents are being supplied herewith, but will be provided upon request.

EXPLANATION OF RELEVANCE

The relevance of reference B2 was discussed in the Specification. References B1-B5 were cited in the International Search Report. References B6 and B7 were cited during the prosecution of the priority document. References B1, B7, and B3-B6 are in English.

Reference B1: JP 2002-1 74697 discloses a luminescent layer but fails to disclose a hardened region within the layer.

Reference B2: DE 100 48 810 discloses a luminescent layer but fails to disclose a hardened region within the layer. Instead it discloses applying a further hardened layer and therefore discloses a multi-layer structure. Further protective functions like protection against moisture are not disclosed.

Reference B3: EP 0 304 300 discloses a luminescent layer with a multi-layer structure but does not disclose a hardened region within the layer nor a hardened layer at all.

Reference B4: EP 0 510 753 discloses a luminescent layer with a further protective layer that is applied as a liquid and then cured. However curing does not imply hardening and a hardened layer is not disclosed.

Reference B5: EP 0 908 900 as the precedent mentioned prior art discloses a luminescent layer with a further protective layer that is applied as a liquid and then cured and fails to disclose any hardened layer.

Reference B6: EP 0126218 discloses a luminescent layer that is cured in order to make it hydrophilic. The hydrophilic character improves adsorption of a liquid sample that is to be examined. However no hardened layer is disclosed.

Reference B7: JP 10239498 discloses a luminescent layer with a further protective layer. Neither a hardened layer nor a hardened region of a layer is disclosed.

The filing of the present Information Disclosure Statement is not to be construed as a representation that a search has been made, and is not to be

10/535332

JC20 Rec'd PCT/PTO 18 MAY 2005

construed as an admission that the information cited in the present Information Disclosure Statement is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b).

The above citation of related art is not a representation that such art constitutes a complete or exhaustive listing of all pertinent related art, nor that it necessarily includes the closest or most relevant art. The aforementioned citation comprises a voluntary citation of related art of which applicant and his attorney are presently aware and is not intended to serve as a substitute for the Examiner's own search.
